# ❖ VS Code 中文化

# October 2022 (version 1.73)

Welcome to the October 2022 release of Visual Studio Code. There are many updates in this version that we hope you'll like, some of the key highlights include:

- **Search include/exclude folders** - Quickly set folders to include/exclude in the tree view.
- **Command Center mode shortcuts** - Displays commonly used modes before recent files list.
- **Merge editor improvements** - Access Combination option to auto merge conflicts.
- **Markdown automatic link updates** - File and image links updated on rename/move.
- **More audio cues** - Task completed or failed, Terminal Quick Fix available.
- **vscode.dev protected branch workflow** - Create new branch when committing to protected branch.
- **New Python extensions** - New standalone extensions for isort, Pylint, and Flake8.
- **Dev Container Templates** - Create new Dev Containers based on existing templates.

If you'd like to read these release notes online, go to [Updates on code.visualstudio.com](https://code.visualstudio.com/updates).

**Insiders:** Want to try new features as soon as possible? You can download the nightly **Insiders** build and try the latest updates as soon as they are available.

## Accessibility

### New audio cues

There are new **audio cues** to help with Tasks and the Terminal.

- Task completed - sounds that a task is completed (controlled by the `audioCues.taskCompleted` setting).
- Task failed - sounds when a task fails (`audioCues.taskFailed`).
- Terminal Quick Fix - if a Quick Fix is available on the current line (`audioCues.terminalQuickFix`).

### Word wrapping in screen reader mode
